**NEW WEALTH**  
**EVOLUTION FORMULA**

# TRIBUTE TO THE WISDOM OF [STABLE]

## 【Barrel Theory】

In the past, our concept of "steady and fast running" combined with the on-chain financial management philosophy and the fork fission model broke the crisis of the collapse of various economic models caused by human greed, steadily guarded all shortcomings, and gave our families a paradise where they could continuously receive the water of wealth.

# APPLAUSE TO YOURSELF

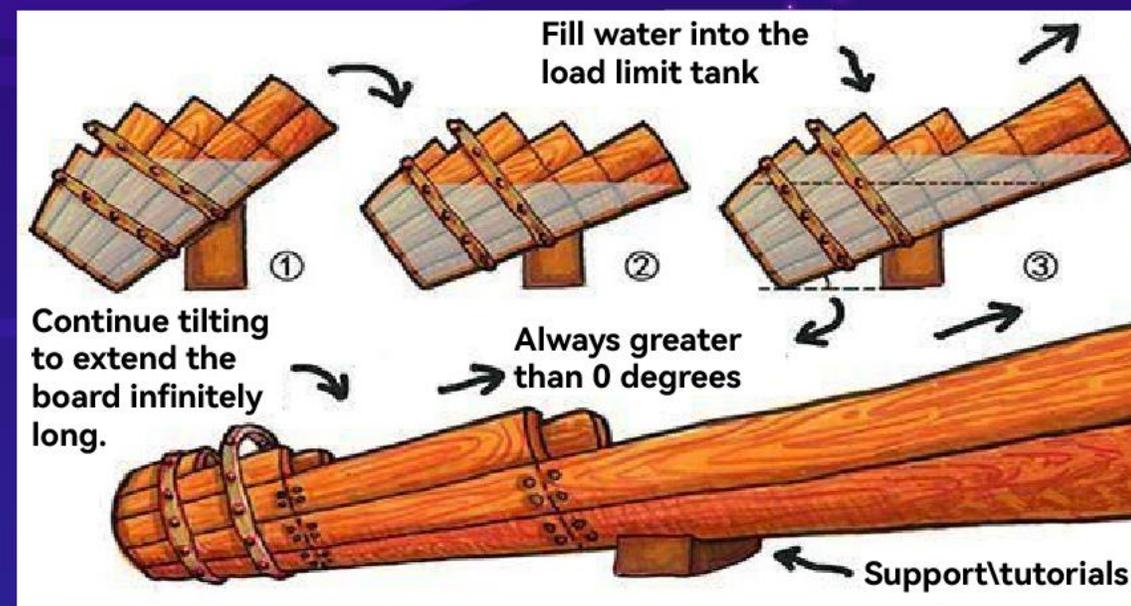

In the past, we have enjoyed multiple rounds of fork dividends. The benefits are due to your clear understanding of the "risks" and your deep understanding of the "rules".

This is the "wealth force" that is more valuable than income

# DEFINE THE COORDINATES OF THE NEW 【New Bucket Theory】

- Wealth growth depends on stability: in the past, we kept the shortcomings and received stable cash flow;
- and when there is stable support and direction - releasing the value of the long-term version to the limit, we can achieve explosive wealth growth! There is no doubt that the on-chain economy is this long-term version!

## DUAL FLYWHEEL OPTIMIZATION CONFIGURATION SCHEME

Emerging asset allocation is the first choice for high net worth individuals

According to McKinsey's "2024 Global Wealth Management Trends Report", among the high-net-worth individuals with investable assets exceeding US\$1 million worldwide, 78% have already allocated "emerging cultural assets" (including trendy toys, meme coins, and digital artworks) - they have proved with their actions: "Stability" is defense, and "explosion" is offense. ";

It is not to "replace" the fundamentals of forked financial management, but to "upgrade" the new structure of asset allocation - make good use of the profits already obtained, and the money-making allocation will detonate the long-term value!

# NEW GENERATION OF TRENDY MEME COINS WITH [STABILITY] AS THE ORIGINAL FORCE, IGNITE THE POTENTIAL ENERGY OF [EXPLOSION]

Global funds are chasing the  
new trend of "culture + finance"

According to CoinMarketCap 2023 report

The market value of meme coins has increased  
by 230% year-on-year  
The average daily transaction volume of meme coins  
worldwide exceeds US\$5 billion

Pop Mart's 2023 annual report shows that 28%  
of its trendy toy users are over 35 years old

Today, we bring you CBB, which is a "wealth leap engine"  
tailored for "smart you"

It comes from an explosive long track, but the supporting and guiding  
base logic is also "verifiable and predictable"

and MEME explosion

# SCARCITY + EMOTION = VALUE

Scarcity makes things valuable, which is the iron law of value that transcends time - the premise is to empower "things"

The essence of trendy finance

is not "hype"

it is the "explosive resonance" of  
"cultural identity + financial premium"

# CORE FEATURES

## Visual symbols

Blunt outline + big eyes + high-saturation color matching: "imperfect cuteness" hits the psychology of "rejecting standardized aesthetics"

## Emotional implications

The slightly scary expression + background story projected the three major emotional anchor points of "healing", "companionship" and "self-projection"

## Financial Continuity

Through strong IP scene extension, multi-scene social configuration, and systematic industry regulation, it continues to gain explosive resonance

Meme application extension scenarios

Pop Mart real blind box

On-chain mechanism management

# THE POPULARITY OF MEME COMES FROM [FOMO] IT'S NOT JUST FOMO

The popularity of MEME coins = Strong community culture (belief) ×  
social media fission (dissemination) ×  
market sentiment (fomo) × mechanism design (incentive) ×  
narrative hot spots (stories).

Among them, the community is the "core",  
social media is the "accelerator",  
market sentiment is the "fuel", and mechanisms and  
narratives are the "amplifiers".
